DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Runge US PN 5,688,245 in view of Sherts et al. US PN 5,947,896.

Runge discloses in figure 1 and lines 13-30 of col. 4 a system for preventing collapse of heart chambers comprising a pump and cannula. Runge lacks the express written disclosure of including a cradle. Sherts et al. teaches in figures 8,10, and 27 various cradles to support a heart during bypass surgery.

Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the system disclosed by Runge by including a cradle as taught by Sherts et al. in order to support the heart during bypass surgery.
